DETAILED ACTION***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-13 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 86/04498 to Hallberg.

Hallberg discloses an implantable surgical device having a deployed shape and an undeployed shape, said device comprising: an elongated flexible inflatable portion (4); and an elongated flexible and substantially inextensible band portion (7) having a distal end, a proximal end and a longitudinal axis therebetween, said band portion being attached to said inflatable portion along an inner face thereof (FIG. 1), wherein when said device is in its undeployed shape at least a portion of said band portion has a concave cross section, taken perpendicular to said longitudinal axis; wherein said inflatable portion and said band portion are integrally manufactured as one part (page 3, lines 25-26); wherein said band portion in its deployed shape has a substantially flat cross section (Page 3, lines 20-23), taken perpendicular to said longitudinal axis; wherein said band portion is at least partially made from at least one of silicone and polyurethane (Page 4, lines 12-17); further comprising a means for attaching said distal and proximal ends of said band together (i.e., an injection port (6) in fluid communication with said inflatable portion.

3. Claims 1-3, 5-7, 9-12 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,601,604 to Vincent.

Application/Control Number: 10/784,416
Art Unit 3733

Page 3

Vincent discloses an implantable surgical device having a deployed shape and an undeployed shape, said device comprising: an elongated flexible inflatable portion (16); and an elongated flexible and substantially inextensible band portion (11) having a distal end, a proximal end and a longitudinal axis therebetween, said band portion being attached to said inflatable portion along an inner face thereof (FIG. 1), wherein when said device is in its undeployed shape at least a portion of said band portion has a concave cross section, taken perpendicular to said longitudinal axis; wherein said inflatable portion and said band portion are integrally manufactured as one part (Column 3, lines 2-5) wherein said band portion in its deployed shape has a substantially flat cross section (FIG. 2), taken perpendicular to said longitudinal axis; further comprising a means for attaching said distal and proximal ends of said band together (13, 19); an injection port (14) in fluid communication with said inflatable portion.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jessica R. Baxter whose telephone number is 571-272-4691. The examiner can normally be reached on M-F 8:30AM - 5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eduardo Robert can be reached on 571-272-4719. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
